

EE 492 WEEKLY REPORT 1

Date: 8/30/16 - 9/7/16

Group number: DEC1608

Project title: Reiman Garden Butterfly Interpretation Application

Client: Nathan Brockman -- Curator, Christina Reiman Butterfly Wing

Advisor: Dr. Rover

Weekly Summary (Short summary about what you did this week)

This week has been mostly about getting our team up and going again after the long break. We have had a few meetings with our team to set priorities and start assigning tasks.

We have also been in contact with our adviser and our clients. We meet with our adviser (Dr. Rover) last thursday to give her an update on our status and plan for the future. Michael, our team leader, also talked with Nathan via the phone and informed him of our status.

This week marks the end of the first sprint. There were a few tasks that were late. This is likely due to our underestimation of how much time an individual item would take. Preventing instances like this will be a priority in the future.

Past week accomplishments

- Deployed test server
- Get in contact with our client and adviser
- Updates to component design diagram
- Basic Shipment information input page

Plan for coming week

- Support for Add / Edit / Edit Butterfly entry
- Basic search page created
- Create google forms feedback
- Pull statistics from DB instead of hard coding on the statistics page

Individual contributions
