

EE 492 WEEKLY REPORT 13**Date:** 11/23/16 - 11/30/16**Group number:** DEC1608**Project title:** Reiman Garden Butterfly Interpretation Application**Client:** Nathan Brockman -- Curator, Christina Reiman Butterfly Wing**Advisor:** Dr. Rover**Weekly Summary (Short summary about what you did this week)**

Due to the interruption of Thanksgiving break we are not really in a sprint right now.

The goal now is to get all pending pull requests merged in. New development except for critical bug fixes should be put on hold so that we can make sure the site is stable enough for demoing at the end of the semester.

The front page branch has had some review findings. Due to the size of the updates, the review cycle is taking a bit longer than anticipated. It should be merged in soon.

Other branches such as the Search Page updates and the Excel import/export utility have been merged.

Significant work went into getting the poster created and that was submitted the 29th.

We also set up a meeting to talk over the end of the semester with Nathan for Thursday Dec 8.

Past week accomplishments

- Poster
- Search page updates merged in
- Import/export utility merged in
- Dealt with some bugs that had arisen in the front page branch

Plan for coming week

- Final report
- Update presentation
- Any final bug fixes

Individual contributions
