

EE 491 WEEKLY REPORT 6**Date:** 2/23/15 - 3/1/15**Group number:** DEC1608**Project title:** Reiman Garden Butterfly Interpretation Application**Client:** Nathan Brockman -- Curator, Christina Reiman Butterfly Wing**Advisor:** Dr. Rover**Weekly Summary (Short summary about what you did this week)**

This week was the start of our first sprint. During this sprint, each team member worked on the first version of a page of the web application. These web pages correspond to the major activities of the web app. The pages will be turned into templates to be used by the webapp to generate customized web pages. The code for the pages will be committed to our repository. At the end of this spirit we will compare the pages and work to make them stylistically consistent.

This week, we also made improvements to the project's website. These include improvements to the formatting and adding to the content. All of our finished documents are now available on the website, along with a summary of our project and a list of team members and their roles.

Past week accomplishments (please describe as what was done, by whom, when)

- Project Web page improvements
- 5 slides for presentation in class
- first versions of the web pages (ongoing)

Plan for coming week

- first versions of the web pages (ongoing)
- finish slides for presentation in class
