

EE 491 WEEKLY REPORT 7

Date: 3/8/15 - 3/22/15

Group number: DEC1608

Project title: Reiman Garden Butterfly Interpretation Application

Client: Nathan Brockman -- Curator, Christina Reiman Butterfly Wing

Advisor: Dr. Rover

Weekly Summary (Short summary about what you did this week)

This week we completed and submitted the first version of our Design Document.

We also finished our first sprint. Everyone completed one of the web pages for the site. During our sprint review, we reviewed everyone's work and decided on which pages style we liked best. The the others will modify our designs to follow their style to make the website consistent in appearance. Ideally, we will all of our pages will share one master css file for the overall style of the site.

The next sprint has been discussed but won't officially start until after spring break. During this sprint, our goals will focus on backend support for what we have. The backend will be written in PHP with a mySQL database.

Just prior to break, we received the database dump of the existing database. We will review it and decide if we like its schema or weather we want to create a new schema and port the data over.

Past week accomplishments (please describe as what was done, by whom, when)

- Finished Sprint
- Compared web pages and agreed on a standard style
- Design Document Submitted
